DETAILED ACTION

Allowable Subject Matter

All pending claims are allowed. Claims 1-5, 8-9, 11-13, 18-102 are allowed. The following is an examiner's statement of reasons for allowance: Through a combination of claim amendments and arguments that clarified the meaning of the claims, applicant has overcome the prior art. As noted in the file history (such as at pages 17-26 of the amendment of November, 2005), the claimed inventions are meant to be within the situation of the integrated circuit and field programmable gate array. The security circuit is contained within the integrated circuit. The claimed invention encrypts the bitstream within the FPGA. See the amendment, pages 17-26. The backup battery is connected to an element of the FPGA which stores a cryptographic or security key. The prior art did not teach or suggest the particular features of the claims in the context of the other limitations of the claims.

EXAMINER'S AMENDMENT

As suggested by Applicant (in file history):

Claims 103-111 are cancelled.
